

Ultra Low Freezers

B Medical Systems | U Range

Ultra low freezers are devices intended for the storage of blood components and blood plasma, human cells, tissues, live virus vaccines, and other laboratory samples at ultra low temperatures down to -86°C. The devices include an integrated alarm system that warns against unexpected temperature excursions and power failures.

Compliant to DIN 58375 | Medical Device according to MDR (EU) 2017/745, Class IIa or 21CFR Part 864.9700, Class II

Blood Management Solutions

Safety Standards **B Medical Systems**

The Safety Standards developed by B Medical Systems define certain significant technical features of a product. These ensure the safe storage of the preparations as well as setting the highest standards of safety for the user.

D Modical Systems Floritonics
B Medical Systems Electronics
B Medical Systems 7" full touchscreen display
Power indicator light and digital temperature indicator (display: 0.1 digits)
Self-contained alarm system with integrated battery takes over the alarm function and temperature value measurements in case of system failure for at least 48 hours
Acoustic and visual alarm signal in case of temperature alarm and system failure
The alarm history function on the electronic stores all the relevant values during a temperature alarm, such as: min., max., average temperature and alarm duration
Remote transmission alarm signal (via potential-free contact) in case of temperature alarm (change-over contact)
Door opening alarm (visual / acoustic)
Designed and tested for climatic class SN / T (ambient temperature range +10°C to +43°C)
Interior made from stainless steel
Additional remote transmission alarm signal (via potential-free contact) in case of system failure (change-over contact)
Smooth castors for optimum flexibility of movement
External water cooling
Ambient temperature sensor
Ethernet interface for the visualization of all operating and control functions (hardware and software settings) via °B Connected monitoring software on a peripheral device (computer)
B Connected - Universal software for the monitoring of refrigeration devices, including the acquisition, recording and visualization of temperature data

Ultra Low Freezers

B Medical Systems | U Range

5 models • Volume 214 > 895 L • Set temperature -82°C • Climate class SN/T • Compliant to DIN 58375 | MDR (EU) 2017/745, Class IIa

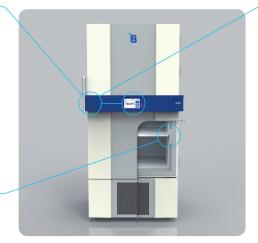

In conformity with national and international guidelines, regulations for Medical Devices offering reliability, efficiency and safety at an optimal price.

MODELS U201-401-501-701-901 | PREMIUM LINE

Exclusive integrated electronics handle bar (Patent pending)

All functionalities are easily accessible:

- Digital control with full functionalities -New B Medical Systems 7" full touchscreen display integrated at optimal level in the door handle with pre-installed connection allowing exclusive °B Connected monitoring functionalities
 - Open/close Heavy duty door lock mechanism

Special features

- Integrated pressure release valve in the door permitting faster opening in one move, and offering easy access for cleaning
- Insulated inner doors for significantly lower loss of cooling when open
- · Full compatibility of inner modules and rails, no need to buy new racks, you can keep racks previously used in different models

• High quality materials

New high quality coating, certified medical devices quality and antibacterial, high quality steel for better longevity and easy hygiene

Versatile modularity

Excellent storage capacity and modularity -Large choice of racks offering modularity for every need.

Ultra low freezers are devices intended for the storage of blood components and blood plasma, human cells, tissues, live virus vaccines, and other laboratory samples at ultra low temperatures down to -86°C. The devices include an integrated alarm system that warns against unexpected temperature excursions and power failures. U models reflect the highest and most uncompromising requirements with state-ofthe-art technology and economy. The cooling system is optimally designed with respect to energy consumption as well as to the development of waste heat and noise. Standard factory setpoint is -82°C, temperature is adjustable from -20°C to -86°C.

EXAMPLE OF "STABLE RUNNING (TEMPERATURE STABILITY)"

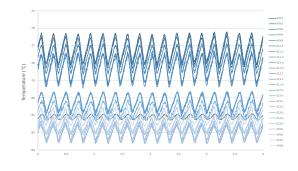

For all models, temperature distribution graphs for the stages "Cool Down (Cooling)", "Stable Running (temperature stability)" and "Hold Over (temperature graphs, for example in case of system failure)" are available upon inquiry for various voltages. Determined at 5 measuring points per level or compartment (empty).

INTEGRATED PRESSURE RELEASE VALVE

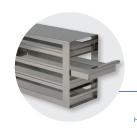

This aluminium die cast handle offers a strong and ergonomic feeling that allows the user to open the door with one hand. Inside the freezers, the vacuum will be automatically removed through a release valve, located in the door, in order to allow easy cleaning.

The handle is equipped with an electric lock that can be deactivated through the user interface.

VERSATILE MODULARITY

Excellent storage capacity and modularity - Large choice of racks offering modularity for every need.

SEPARATOR FOR S-RACK

Full functionalities at a glance

B Medical Systems | Electronics

The new B Medical Systems Electronics

offers a wide range of adjustment and diagnostic functionalities as well as additional protection / warning operations (via external alarm operations, histories and individual display signals).

PREMIUM LINE | Multifunction electronics with 7" full touchscreen display, integrated at optimal level in the door handle with pre-installed connection allowing exclusive °B Connected monitoring functionalities.

OPPOWER SWITCH OFF / ON

- To switch on press the ON/OFF button for 1 second. The green LED will light up
 - Switch off protected by password.
 The door will automatically unlock before powering down

Main Many (12) | International Control Contro

• Touchscreen 7" full display

During normal operation the display shows:

- At the top: current voltage, current time, gasket heater and login status (user level)
- Left-hand side: temperature of the regulation sensor (displaying this temperature can be disabled through the settings) and internal temperature displayed in °C (Celsius) or °F (Fahrenheit) in increments of 0.1°
- Right-hand side: touch buttons to access door unlock, clean, menu, alarm mute and message functions

○ USB port & SD card slot

Acoustic and visual alarm signal

When an alarm occurs, the red alarm LED lights up and an acoustic signal sounds. The corresponding alarm message appears on the display together with the inside measured temperature. If several alarms occur simultaneously, the messages will be shown alternately.

Keycard reader

Login / Unlock using an NFC card

Touch buttons

- DOOR UNLOCK button: unlocks the door of the device
- CLEAN button: the cleaning button allows the user to disable
 the touch capability of the screen for a short period of time in
 order to clean the screen. This button is replaced by the logout
 button when user is logged in
- MENU button: allows access to the menu screen
- ALARM MUTE button: deactivates the acoustic alarm for a predefined period of time
- ACTIVE ALARMS AND WARNINGS button: during a warning or alarm situation, the color of this button and the corresponding level will change. Information on an active alarm and warning is accessible by pressing the message button

Optimum control and protection

B Medical Systems | °B Connected & RTMD

***B CONNECTED | MONITORING SOFTWARE**

Universal software for the monitoring of refrigeration devices, including the acquisition, recording and visualization of temperature data.

- Unique monitoring software for the full range of Blood Management Solutions and Medical Refrigeration products
- Web-based interfaces for computers and mobile devices
- Modern design for simple and intuitive use
- Graphic display of temperature curves
- Integrated event and activity history of appliances' components
- Data recording on centralized database for long-term archiving
- Easy setting of specific alarm, via email or SMS alerts
- Generation of reports compiling crucial data and activities
- Temperature and detailed device data export for third-party software
- Important cost advantage compared to a traditional circular chart recorder and its spare parts
- REST API to access raw data directly from the database in read-only mode

KEY BENEFITS:

- Unique interface for the monitoring of the full range of refrigeration devices
- Centralized database providing data access to entire customer network

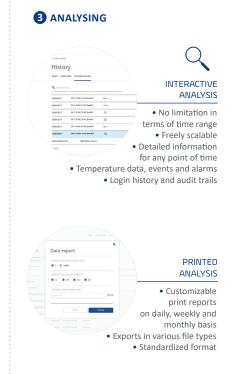

- Optimized design for mobile and touch compatible devices
 Support of multiple
- Support of multiple languages
- Real-time data: Current temperatures, set point, upper and lower limit, door state, compressor runtime
- Log data: Events, alarms within date/time, event type, description of the event. Event and alarm confirmation function
- Parameter settings of each device: Factory settings, real-time clock, language, firmware version, RS485 address, IP address

- > Complete & legally safe documentation of temperature data
- > Comprehensive applications and diagnostic functionalities

RTMD | REMOTE TEMPERATURE MONITORING DEVICE (INTEGRATED)

Hardware module monitoring all operating conditions and passing them through our web based Vaclog network ensuring a high performing and reliable cold chain 24*7.

- Real time monitoring of temperature(s), door / lid openings & GPS position
- Includes a SIM chip with prepaid communication for the duration of the warranty period contractually agreed
- Crucial for the quality surveillance of the cold chain and monitoring of vaccines
- Rechargeable battery
- Worldwide remote monitoring & data access over WEB
- Only 2G or 3G coverage is necessary to operate
- Google Maps positioning using integrated GPS module
- Alarms include temperature deviations and door / lid openings
- Alarms are sent by text messages or emails

State-of-the-art technology for the exacting needs of the medical world

Reliable solutions for safe vaccination around the world

After Sales support and service

We strive to provide you with the highest standards of service; not only through our selected distributors and partners for all your maintenance and service but also our second line trouble shooting and after sales service. This factory-based group of engineers is there to help our partners and yourself to get the best solution for your cold storage needs.

Safe global blood management: from collection to transfusion, transportation, processing and storage

Our Global Expertise

SAVING LIVES THROUGH RELIABLE AND INNOVATIVE TECHNOLOGY

B Medical Systems (formerly Dometic Medical Systems) has more than 40 years' experience in the medical refrigeration sector.

The company, formerly known as Electrolux Medical Systems, was founded in 1979 when the World Health Organization approached Electrolux in Vianden, Luxembourg, to create a solution for the safe storage and transport of vaccines around the world. In 2001, Electrolux Medical Systems became part of the Dometic Group, and was renamed Dometic Medical Systems. Having established a legitimate reputation in the medical equipment industry, the company has also become a global leader in vaccine cold chain.
